DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The disclosure is objected to because of the following informalities: reference to the specific claims in the specification is improper and should be deleted. Appropriate correction is required.

Claim Objections

Claims 17 and 24 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 17 does not further limit the claim from which it depends (claim 1).

Claim 24 does not further limit the claim from which it depends (claim 18).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3654

Claims 1-18 and 25-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claims 1 (lines 8-9) and 25 (lines 3-5), it is unclear as to what element is being turned or pivoted to adjust the reel unit on the fishing rod.

Claim 2 is indefinite because of the use of “and/or”.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by French document FR 2691044 A1 to Jean et al.

Jean, for example in figure 1, discloses a reel unit for a fishing line for use on a fishing rod, comprising a housing, a spool 3 rotatably mounted on the housing that can be rotated via a gear unit by means of a hand crank for reeling in and reeling out the line, and a holder 1 for mounting the reel unit to the fishing rod, wherein the reel unit can be adjusted on the holder, by turning or pivoting on an axis (Y-Y') parallel or approximately parallel to the axis of the reel.

Claims 19-23 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent no. 5,833,155 to Murayama.

Art Unit: 3654

Allowable Subject Matter

Claims 2-18, 24 and 26-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

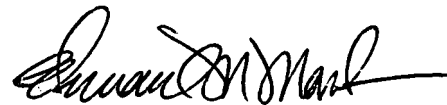

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
